

# IRTS Radio News Bulletin Sunday 16th May 2010

---

## Theory Examination

The next theory examination for the Amateur Station Licence will be held on Wednesday, 7th July at 2pm in the ComReg Offices in Dublin and at other centres if warranted by the numbers.

Information on examination fees and other details please see 'Theory Examination' in the 'Information' section of the IRTS website at [www.irts.ie](http://www.irts.ie)

Intending candidates are also referred to 'Studying for the Amateur Radio Examination' in the 'Downloads' section of the website.

The latest date for receipt of applications to sit the examination is Wednesday, 23 June next but it is important to note that places at the exam are allocated on a first come first served basis.

## AREN News

AREN members Liam EI3HK, Chris EI7AAB, Nick EI2JL and Paul EI2CA, provided assistance last weekend to the Inland Waterways Association in bringing boats between locks into the Dublin Basin for the Dublin Rally. The return leg will be on 21-23 May & anyone available to assist is requested to contact Liam EI3HK on 01-8316266 or 086-2521542

Upcoming events for AREN include the Croi cyle race in Galway on 23 May and the Galtee Walking Festival on 5 & 6th June in Tipperary. Please contact John Ronan EI7IG if you are available to help at any of these events, and new members are always welcome.

## How did Amateurs get their bands?

On Tuesday May 4th, John Breen EI7BV gave a most interesting talk to South Dublin Radio Club. Titled "How did Amateur get their bands - the VHF, UHF, SHF & EHF bands", the talk was a follow-on to one he had given last year which covered the bands below 30 MHz. A large number of club members were in attendance together with guests from the Department of Communications, Energy and Natural Resources

and ComReg.

John traced the origins of amateur allocations starting with the 1947 World Radiocommunication Conference in Atlantic City. He showed how, at subsequent conferences, new frequencies were allocated, but also detailed the extent to which allocations to the amateur service were eroded with a reduction of primary and exclusive amateur bands to secondary or shared use.

John emphasised the work of IRTS and IARU nationally and internationally over the years in both obtaining and defending allocations for the amateur radio and amateur satellite services. We should all remember that without access to spectrum our hobby would be dead.

### **Stolen Antenna, Drogheda**

The antenna is a Watson Multi-Ranger 9. It is a distinctive antenna, as many of you will know. It has a black bottom part with six headphone-like sockets, and an extendable whip. Even at its shortest it is about four feet and fully extended is more than six feet.

This particular antenna has some recently-added distinguishing features. When it was stolen, the whip was shortened for six meters. If extended by opening the little nut with a hex key, there are four further black "rings" along the whip. So if anyone is offered one of these for sale, check the whip for five black rings, marked with permanent marker.

If anyone happens to be offered one of these for sale in the next while, Anthony EI2KC would appreciate an email or a call at 086-8335055.

---

### **Alfa Romeo Special Event**

Look for Frans, PC2F, to activate the special event callsign PC100AR between May 29th and June 26th.

Activity is to celebrate 100th anniversary (June 24, 1910) of the famous Italian car. Activity will be on the HF bands.

A special QSL card will be made after this period and will be sent via the Bureau or direct Also, an eQSL will be sent.

---
